DETAILED ACTION

Election

Applicant's election without traverse of Group I, claims 1-9 in Paper No. 6 is acknowledged.

Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6, drawn to a semiconductor device, classified in class 257, subclass 315.
- II. Claims 7-9, drawn to a semiconductor memory circuit, classified in class 365, subclass 02+.

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case unpatentability of the group I invention would not necessarily imply unpatentability of the group II invention, since the device of the group I invention could be used in a materially different process from that of the group II invention, for example the semiconductor device may be used in a protection circuit.

Art Unit: 2815

Because these inventions are distinct for the reasons given above and, as shown by the above different classifications, the fields of search are not coextensive and separate examination would be required, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors are no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).
